Art Unit: 1652

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-21, 24-35, drawn to nucleic acids encoding a promoter regulated by a metabolite operably linked to a sequence encoding a heterologous polypeptide, and host cells and kits comprising said nucleic acids.

Group II, claim 22, drawn to methods of producing isoprenoids.

Group III, claim 23, drawn to methods of producing lycopene.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the groups lack any shared technical feature as the nucleic acids of Group I are not used of made by the methods of Groups II and III.

Claims of Group I (1-22 and 24-35) are generic to a plurality of disclosed patentably distinct species comprising different promoters and different heterologous polypeptide genes.

Art Unit: 1652

These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1. Each promoter and heterologous gene is structurally distinct and there is no shared technical feature among the species.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
